## Introduction

### **Welcome to Sell Wholesale Goods & WebSites On Ebay**

I sold my ebay business last year for \$45k. Back then it was publicwholesalers.com and since then has changed to another website that I do not wish to discuss because I honestly do not want to give this person exposure to his new business. He since changed everything to something that is totally different from the business I had going.

I started off with 0 feedback just like everyone else has to but then as I caught on to what ebay sellers were doing I made a CD and I am the original author of Ebay Exposed. Since then people have copied my titles "Ebay Exposed" "Ebay Sources Revealed" and alot more titles. They turned a #1 Selling Wholesale CD into complete garbage and absolutely destroyed the entire idea of the cd's purpose.

Live and learn I guess.....but the amazing thing is that I soon caught on to quite a few tricks and sources that ebay sellers were using and used this to my advantage.

I seen what they were selling and couldn't figure out how they were getting their items so cheap. I basically just did my homework and soon learned everything about the Wholesale Business. I took my knowledge of the companies that I knew ebay sellers were using and created a CD.

I have never before sold on ebay so I again did my homework and figured out how I could possibly get 25 cds sold. Back then the trick was to put an item up for .01 and charge a high shipping fee. That **trick** is still used now but you cannot go that low of a price without your auction being ended by ebay.

For some reason and I still to this day cannot figure it out but bidders never comprehend shipping charges. All they see is the price! For example, I have an item up for \$33.95 plus \$3.50 shipping and another seller has the same item up for \$30.95 \$15.00 shipping...he would receive more bids because bidders are only seeing the price of the item! If you ever figure that one out let me know!

Last year ebay had a category Everything Else/Wholesale. They have since gotten rid of that category and now wholesale is splattered all over ebay in different categories. Nobody was selling any wholesale information back then NOBODY. I saw the advantage and I went for it!

I placed a dutch auction which meant I was selling more than 1 of the same item. I put 150 items (cds) up and put the cost at \$.01 and shipping costs were \$4.99. I would make \$5.00 a cd minus the costs which would be about \$3.80 a cd. **Much too my surprise** because nobody else wasn't offering this my very first auction on ebay ended with over **121** Bids. I made close to \$400.00 in 5 days. I was amazed!

I kept on selling that cd until I sold my business and made over \$40k in just a few short months. The CD was the hottest selling informational CD on ebay. But since then has gotten ruined by other people using the same titles, by ebay switching the wholesale category around and alot more but that's that!

Now in the mean time while this cd was selling so many copies I decided to start my own wholesale informational site which was publicwholesalers.com I put all my sources that were on the cd onto my site and charged \$24.95 per member. Because this was a new site I knew I would need fast exposure to make sales...so I thought up a neat little trick I changed my ebay ID to my WebSite Name! Back then I was cncburner I changed the ID to publicwholesalers.com.

Now because I was getting so many ebay auction hits these people were viewing my website name on top of it! I started getting over 200 hits a day from my auctions alone. People were visiting publicwholesalers.com and paying for Wholesale Memberships!

I was raking it in! Something so easy but I figured it out and that is how you too can advertise your business on ebay.

The thing is now ebay doesn't allow you to use your WebSite address as your Ebay ID so here is another trick I learned.....

## **A Trick To Advertise Your WebSite Address On Ebay 24/7**

**If you have not read the above 3 paragraphs you are not going to understand the next few...please read above if you haven't already.**

Instead of putting yourdomain.com as your ebay id all you need to do is put asterisks in front and behind your ebay id and ebay accepts it!

So now you would put **\*\*yourdomain.com\*\*** and advertise your business on ebay while you are selling and while you are leaving feedback!

Remember each and every time you you leave feedback other people will always see it because they'll be checking up on other peoples feedback which the other people's feedback will be where you left your domain name for all to see!

It's a No Brainer but it works!

**That's my story! Now onto the Good Stuff!**

## **Selling WebSites On Ebay**

As I mentioned in the ad selling websites on ebay are money makers! Some of these sites look like these sellers have actually put thousands of dollars into them but the truth is they haven't at all.

There are alot of sellers who are simply buying website packages they normally come in 10 or so and are reselling those. My opinion is to stay away from those sites as with my cd you get too many people catching onto the idea which simply makes it a boring product. Too many is too much!

It is the same people selling the same websites over and over it just simply means there will be way too many of the same auctions out which gives you too much competition for that type of product.

You need to be unique, you need to come up with a catchy .com name and just go for it. It really is not hard at all to do.

The big money makers are the sites that have membership access or the Pay Per Click Search Engines.

Here is the link below for the same exact scripts that ebay sellers who are selling Pay Per Click Search Engines get their scripts from. Simply click the Pay Per Click Script at the Top.

[www.smarterscripts.com](http://www.smarterscripts.com)

Order that script and you will make a bundle! Come up with a catchy Pay Per Click .com set the scripts up on that domain and put it up for sale.

People coming to buy websites on ebay don't want to do the work. They want someone else's work and they will by all means pay for your Pay Per Click Search Engine!

By the time you are use to uploading this script it should only take you about 30 minutes to finish a website off....put it up on ebay and sell it for over \$100.00. \$100.00 for 30 minutes of work isn't bad now is it?

As I mentioned there is a way for you to get hundreds of new members...the trick that ebay sellers do is this.....

Let's say you set up your New Pay Per Click Search Engine or Membership site..too make it worth even more money you want to get members to sign up that looks good on the website selling portfolio so to speak on your auction.

Well what I've learned is that ebay sellers who are getting ready to sell off a website or keep it for that matter what they do is put up a Free Auction and title it 50,000 free hits or 5,000 free hits etc., whatever you'd like to offer for \$1.00 or \$5.00 again whatever you'd like to offer it for. The lower the better remember there is a point to this.

The point is what you are really doing is nicely tricking the bidder into joining your new membership site or Pay Per Click Site by signing up with your new WebSite. When the bidder orders your offer you have just signed up a new member. After they sign up you simply credit their account with the amount of hits you offered in your auction.

Sellers are doing this so much and nobody is catching on. Each member that signs up boosts their Asking Price when they sell the site off on ebay!

To sum it up...get your membership or Search Engine up and post about 10 different auctions with Buy It Now....offer so many hits for \$1.00 or whatever your price again the lower the better....the person will grab it and BOOM! You've got a new member. Most sellers run a dutch auction which means they'll offer 1000 of these off and get hundreds of new members a week.

Don't worry about getting the traffic going it'll take about a week but the more members that sign up the more traffic your site will produce!

## Forum Scripts

Below you will be given a FREE forum script. This is the best free script on the

internet. It is a very professional looking forum with many modules to add onto it!  
Incredible for FREE!

YaBB is the original FREE, open-source Perl forum that allows you to provide to your visitors a real-time chat and support system. While live chat programs allow people to talk directly, you have to be on them 24/7 to please everyone. With forum software like YaBB, you can talk at any time and everyone can join or read the conversation. So get visitors coming back for interesting discussions, fun chit-chat, or needed support without having to spend thousands of dollars..all with YaBB!

**Key features include:**

- Full administration and moderation options
- Ability to change settings and the template on the fly
- Private boards in which certain membergroups can access
- Many profile options--including signatures and personal information
- Graphical alerts for each new or updated topic

[Pop Up Script](#)

[Free SafeList Script](#)

## BOOST YOUR SALES WITH THIS LITTLE POP UP!

This is definitely a neat little trick.

Let's say that you are offering a product for \$24.95....and the person decides either he doesn't want to join or it's too much money or whatever his reason might be.

What you do is insert the codes below where we tell you and your chances of getting this person to sign up increase by 80%!

This is a countdown script. What you are doing is offering this person a chance to sign up at just \$2.95 for a Trial Version of your offer.

They get 3 days or so to decide if they want to continue or not with your offer...if they don't they need to cancel if they do decide then their credit card will be billed for \$24.95 in 4 days...7 out of 10 people are going to stay with your product so you not only made the \$2.95 but also made another \$24.95 when their credit card gets charged in 4 days after the trial version. Their credit card is then billed every 30 days "recurring billing".

Now the script will pop up the website you are about to make with your offer and on top of the pop up will be a counter counting down from 10 minutes. Meaning they have 10 minutes or so to accept or decline your offer. It is really neat.

The purpose of this is to get more customers once they see this script they will re-consider joining your site!

You need to set up your 3 day offer page something like the below:

### **CONGRATULATIONS!**

You've been chosen to receive a 7 day beta test membership to your.com's Member's Area...

As part of a special marketing test, you'll pay only \$2.95 to "Beta Test" the site for 3 days... but only if you order within in the next 10 minutes!

Instead of \$24.95 for 30 day's access, you'll only pay \$2.95 for 3 day's access!

Click Here To Become a  
Beta Tester Now!

You may cancel your membership at any time which is both easy and automated. If you continue as a member beyond the 7 day trial, it's only \$24.95 monthly.

You have zero obligation.

Put the below into your <HEAD> TAGS </HEAD>

```
<SCRIPT language=JavaScript><!-- Begin  
closetime = 600; // Close window after __ number of seconds?  
// 0 = do not close, anything else = number of seconds
```

```
function Start(URL, WIDTH, HEIGHT) {  
windowprops = "left=50,top=50,width=" + WIDTH + ",height=" + HEIGHT;  
preview = window.open(URL, "preview", windowprops);  
if (closetime) setTimeout("preview.close();", closetime*1000);  
}  
  
function doPopup() {  
url = "the url of the pop up";  
width = 310;  
height = 535;  
delay = 10;  
timer = setTimeout("Start(url, width, height)", delay*1000);  
}  
// End --></SCRIPT>
```

Put the Below into your <body> tag </body>

```
onload="doPopup();"
```

## Wholesale Sites
